

# Easyconnect in a nutshell

Harry Fordham

1<sup>st</sup> September 2021

# CONTENTS

- 1 What is it?
- 2 How does it work?
- 3 What is the benefit?
- 4 What do users think?

# AN INTRODUCTION TO EASYCONNECT

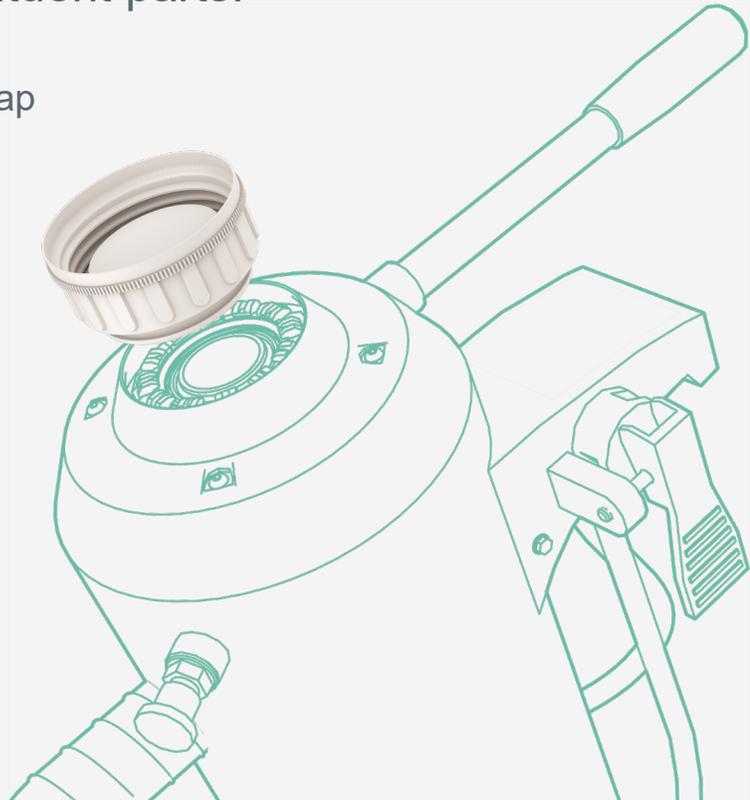

- Supported by Adama, BASF, Belchim, Corteva Agriscience, Certis, FMC, Nufarm, Rovensa and Syngenta
- We are an open group and invite other interested companies to join
- Coupler technology manufactured by Pentair under the brand Cleanload Nexus. Sprayer manufacturers will be offering the CTS as an optional extra
- Convenient pre-fitted easyconnect screw-cap
- Easy to connect and operate
- Fast emptying of all liquid formulations
- Integrated rinsing
- Resealable and leak-proof – essential for part pack emptying
- Compatible with standard recycling schemes

**EASY**  
**CONNECT**

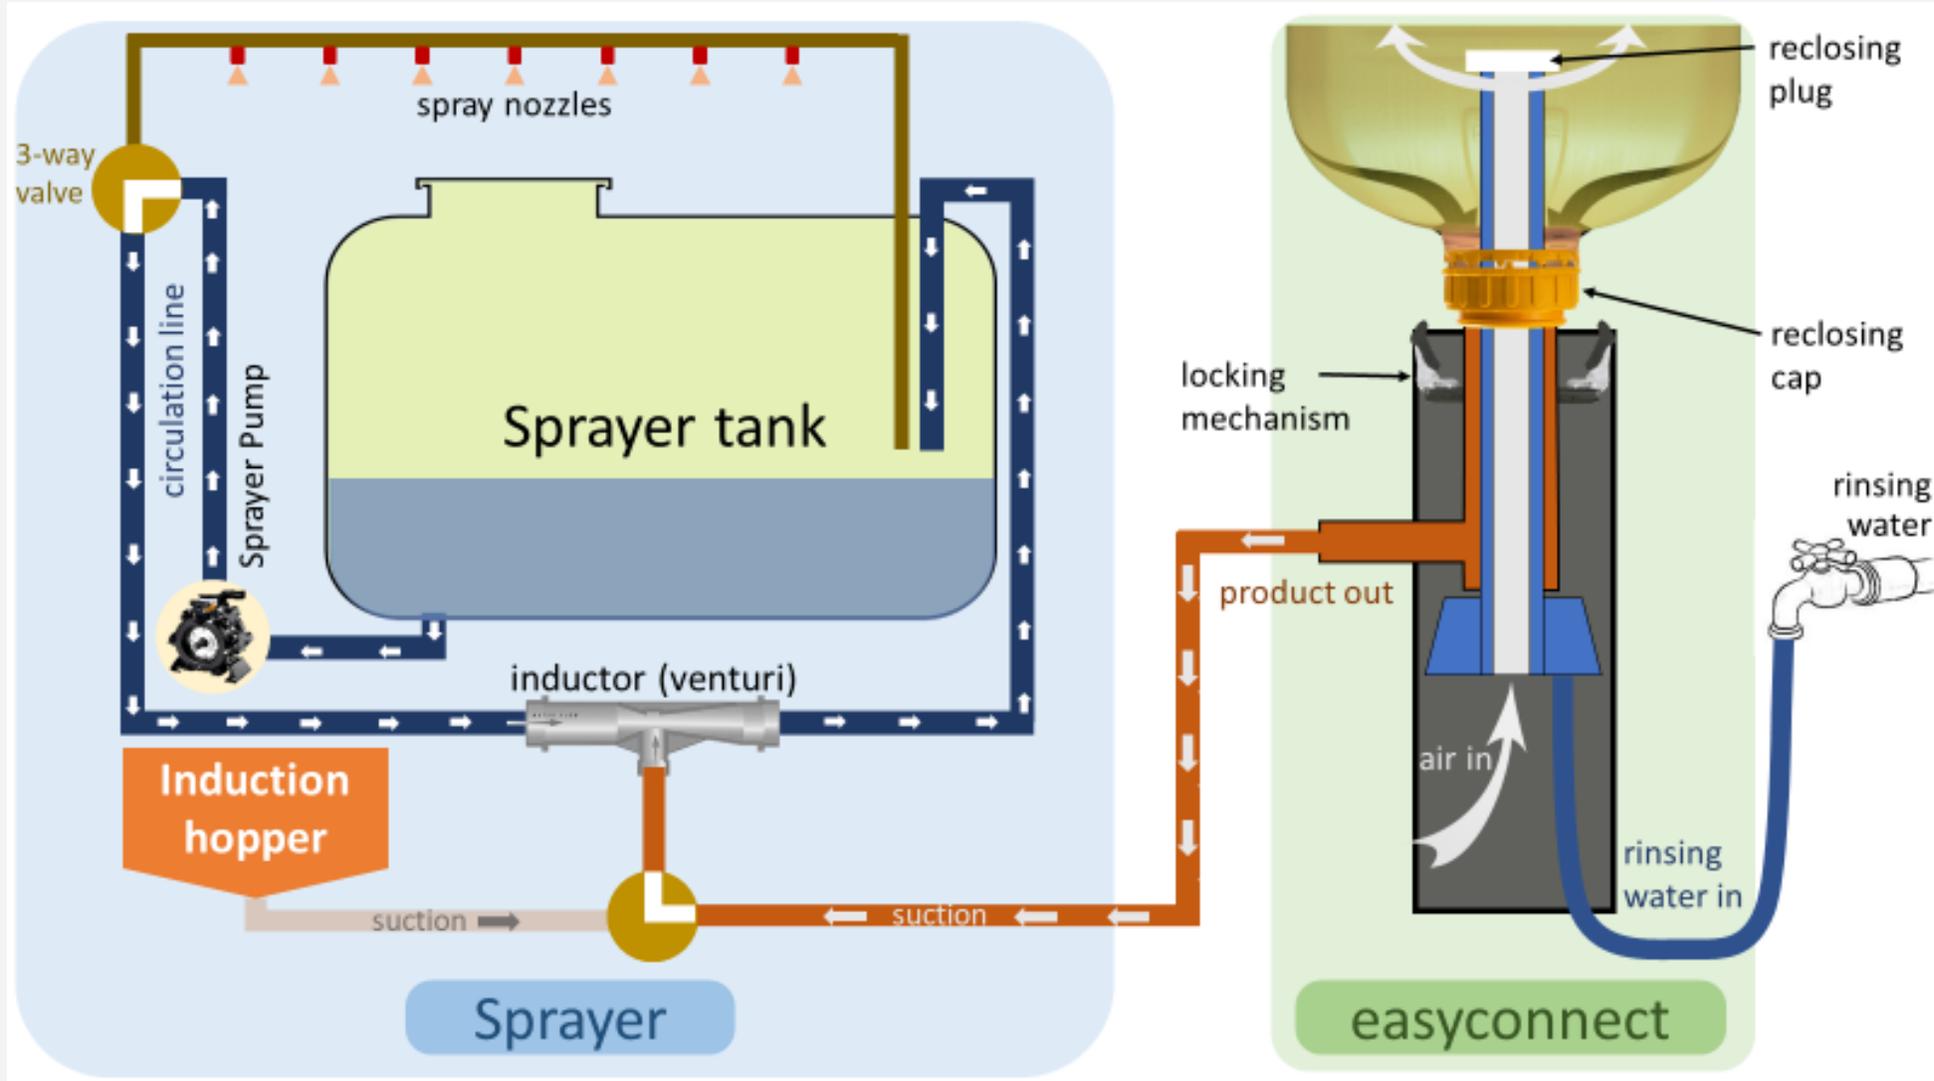

# WHAT IS IT?

- A cap that will be used, and supported by all members of the easyconnect taskforce
- The cap is of an ISO standard and standardised across the taskforce
- It has 3 constituent parts:
  - Dust cover
  - Threaded cap
  - Inner cap

# HOW DOES IT WORK?

# HOW DOES IT WORK?

See video on  
webpage

# WHAT ARE THE BENEFITS?

- **Faster:**
  - The cap has no foil seal and is completely integrated to the can, no need to unscrew prior to filling
  - Pilot users say it is up to 30% quicker than standard filling
- **Easier:**
  - No need for measuring jugs
  - Rinsing and cleaning completely integrated into the coupler mechanism
  - No adapter needed, caps are pre-fitted and will come as standard with cans
- **Safer:**
  - Completely enclosed and integrated emptying and cleaning system
  - No need to remove caps to pour product out
  - No foils on cans

# WHY WOULD YOU RECOMMEND THE EASYCONNECT SYSTEM TO A FRIEND?

“It’s the future of operator safety. Easy to use and once all up and running it is easy to use.”

“Clean and easy to use”

“Because it’s easy to use and quick and safer”

“safety and better filling “

“Easier quicker safer for operators and environment.”

“Safety and speed”

“Lower operator exposure”

N “It saves contact with chemical, its quick and efficient and its very thorough with rinsing! The cts system has to happen now and need all chemical packaging to a standard!”

# EASY CONNECT IS SUPPORTED BY

The drawings, descriptions and technical information contained herein are believed to be accurate, but are, however, of exemplary nature. Since easyconnect CTS is a technical novelty, features and outer appearance of the easyconnect cap, the coupler or canister may change. The easyconnect CTS is designed for use solely with liquid plant protection products filled in canisters pre-equipped with the easyconnect cap. Other uses are not approved and may result in damage to equipment, property or personal injury.

Before working with the easyconnect CTS, carefully read and understand any instructions. For information on training material, please consult your local retailer or visit the website [easyconnect.tech](https://easyconnect.tech). When processing plant protection products – even with the easyconnect CTS – always wear required and appropriate personal protective equipment and ensure compliance with all applicable local laws and regulations.

**Use plant protection products safely. Always read the label and product information before use.**
